

Oracle EBS to APEX

Page Integration

What is EBS to APEX Integration?

EBS to APEX Page Integration is the process of connecting **Oracle E-Business Suite (EBS)** with **Oracle APEX (APEX)** to enable seamless navigation from EBS to APEX applications.

This integration allows users to access APEX pages directly from EBS menus while preserving user session, responsibility, and security context. It is commonly used to extend EBS functionality by developing modern, user-friendly interfaces and custom solutions in APEX without modifying core EBS components.

Accessing Oracle E-Business Suite Data:

The **XX_APEX_EBS_USER** view provides a secure, read-only window into the EBS FND_USER table, ensuring APEX applications access user data safely.

The following code for creating a view in the APPS schema:

```
CREATE OR REPLACE VIEW XX_APEX_EBS_USER (  
    user_id,  
    user_name,  
    start_date,  
    end_date,  
    description,  
    email_address,  
    user_guid,  
    person_party_id,  
) AS  
  
SELECT  
    user_id,  
    user_name,  
    start_date,
```

```

        end_date,
        description,
        email_address,
        user_guid ,
        person_party_id
    FROM   fnd_user;

```

Give grant rights to the Custom schema (**XX_APEX**) from the **APPS** schema:

```
GRANT READ ON XX_APEX_EBS_USER TO XX_APEX.
```

```
GRANT READ on FND_RESPONSIBILITY_VL TO XX_APEX.
```

1.Embedded APEX within EBS

This method embeds an APEX page within an EBS page, it is allowing users to view APEX content without leaving EBS.

APEX Configuration:

The APEX environment setup for this integration type remains the same as described in **Type 1 – Redirect to APEX Page**. Please refer to the above section for detailed configuration steps.

EBS Configuration:

Create Function:

Function: APEX_REP_F

User Function Name: APEX Report Function

URL: GWY.jsp?targetAppType=APEX&apexLayout=EMBEDDED&p=131:2:::

Function	User Function Name	Description
APEX_REP_F	APEX Report Function	

Click Properties tab , Select Type **APEX**

Function	Type	Maintenance Mode Support	Context Dependence
APEX_REP_F	APEX	None	Responsibility

In the Web HTML Tab Pass the URL

Function	HTML Call	MDS Reference Path
APEX_REP_F	GWY.jsp?targetAppType=APEX&apexLayout=EMBEDDED&p:	

Create MENU:

Navigation: Application Developer > Application > Menu

Menu: Specify a name for the menu, **APEX_REP_M**

User Menu Name: APEX Report Menu

Menu Type: Standard

Give the **PROMPT** and Assign the Function to this MENU

Menu: [View Tree...](#)

User Menu Name:

Menu Type:

Description:

Icon:

Seq	Prompt	Submenu	Function	Description	Grant
1	APEX Employee		APEX Report Function		☒
					☐
					☐
					☐
					☐
					☐
					☐
					☐
					☐
					☐
					☐

Click **SAVE**

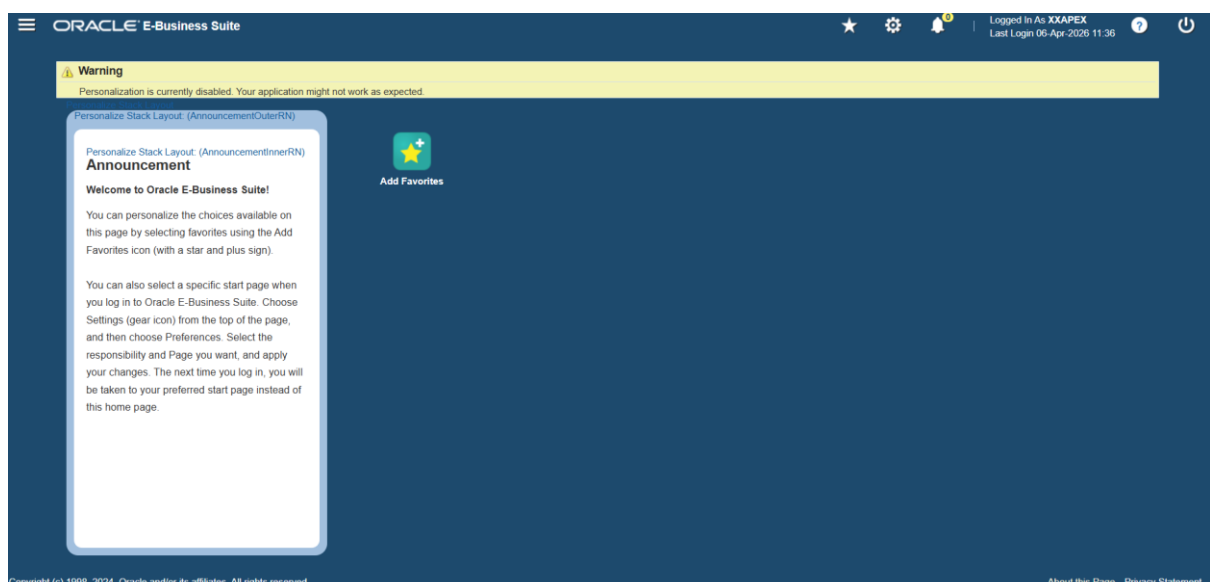

Navigation: System Administrator > Security > User > Define

Query the respective USER (F11)

Click the New icon & Assign the Responsibility

Responsibility	Application	Description	Security Group	From	To
Redirect to APEX	xxapex custom app1		Standard	06-APR-2026	
APEX Report RES	xxapex custom app1		Standard	06-APR-2026	

Login as **XXAPEX** User

Go to the **APEX Report RES**
